Protect-A-Bed has your customers covered

Protect-A-Bed offers a complete, non-chemical bed bug detection, protection and prevention system. From small parcel heat treatment, to passive detection, and long-lasting mattress and box spring protection, the Protect-A-Bed pest defense system is designed to not only be effective, but to add value to both your commercial and residential services.

Stop by the Protect-A-Bed booth during PestWorld to learn how its pest defense system can improve your onsite results, reduce labor costs and increase effectiveness.
